KASU TAKES NOTE AS KADRA ENHANCES TRAFFIC FLOW ON STRATEGIC CAMPUS CORRIDORS

BY: HAMZA MUSA MAKARFI

As part of implementing its broader mandate of providing roads and related infrastructure facilities, KADRA is constructing a traffic light at the Tafawa Balewa Way/Angwan Rimi Road junction.

The project was one of the highlights during the visit of the KASU management team, led by Professor Helen Afang Andow, Deputy Vice Chancellor

Strategy, Innovation and Service Delivery, to the Managing Director of KADRA Dr. Abdullahi Baba Ahmed.

The KASU wider community is advised to take note of this development and exercise caution to ensure safety as the facility becomes operational.

View the progress of work in pictures.

URGENT NOTICE

Following the ongoing construction of the main gate at Kaduna State University (KASU), Kafanchan Campus, traffic through the facility has been temporarily suspended for the next few days to ensure full compliance with construction

safety guidelines.

The project forms part of the broader commitment of the Kaduna State Government to enhance infrastructure standards across the university.
